

Second Workshop

Thank you for joining the second systems sensing workshop of Accelerating Innovation for Resilience (AI4Resilience) on the 18th of July. As you know, the Global Knowledge Initiative (GKI) leads AI4Resilience with support from USAID and in partnership with Spring Activator.

As a pilot program, a major objective of AI4Resilience is learning. This survey is a part of these efforts. AI4Resilience will track responses related to these themes throughout the program. AI4Resilience will directly use feedback on the workshop itself to improve future workshop experiences.

Questions in the survey focus on workshop themes as well as your reactions to the workshop itself. The survey also collects names and demographic information, as this will aid in analysis and understanding the evolution of responses throughout the program. However your personal and organizational data will not be associated with the data analysis or any information that is shared publicly. Your responses will be kept strictly confidential with identifying information available only to members of the AI4Resilience team who are analyzing the data.

If you have any questions about the survey or AI4Resilience, please contact us at ai4resilience_info@gkinitiative.org.
